

Datahug in Google Chrome

Datahug provides you with a single view of all the B2B relationships that exist within your organization. You can leverage this Datahug information directly in Google Chrome with the Datahug Chrome plugin.

Install the Datahug Chrome Plugin

Download the Datahug plugin by following the link on the Datahug home screen (<https://apps.datahug.com>).

Follow the on-screen instructions and if you have any issue with permissions contact your IT administrator.

Insight when Browsing

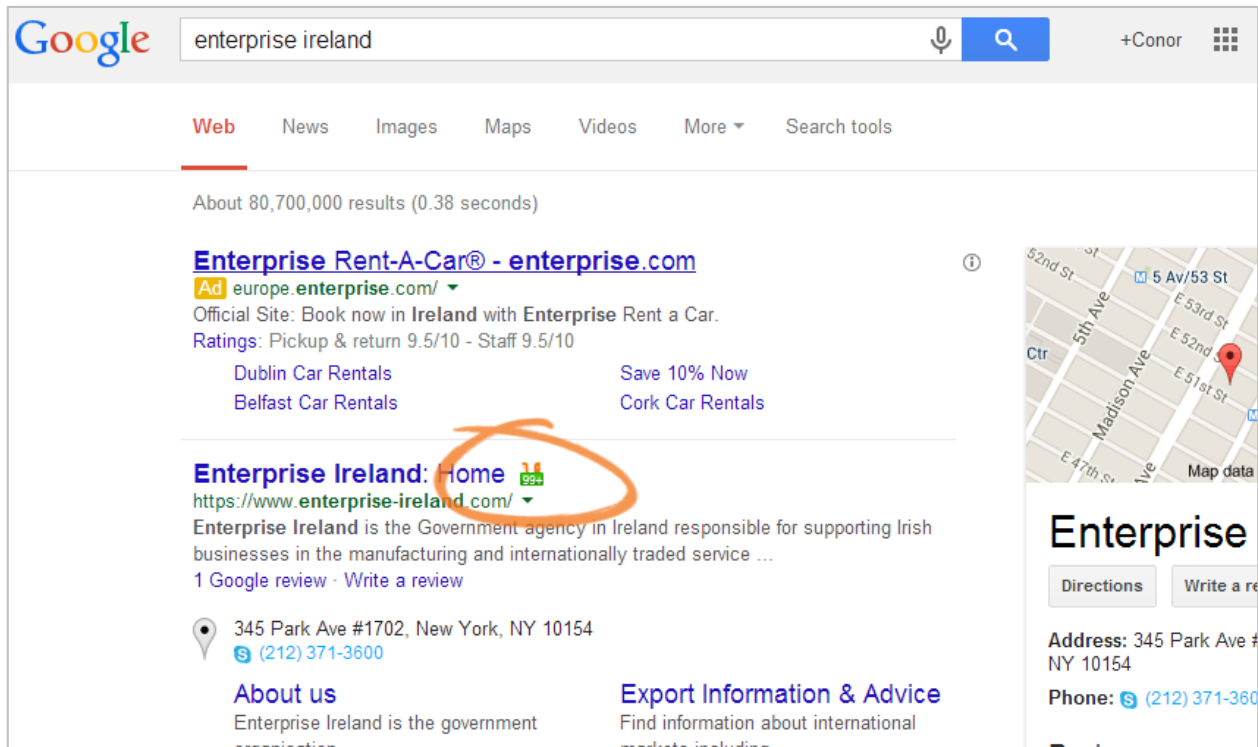

When you are on a company's website you will see the Datahug icon at the top of your browser light up when connections exist with that company in your Datahug network.

Clicking on the icon will bring you to the company's profile page in the Datahug web app.

Insight in Google search results

When you search for a company in Google an icon will appear next to the results if a connection exists in Datahug for that company.

Hover over the icon to find out more details. You can look at the company profile on Datahug by following the link.
